

The Proven Adhesive for PVC Vinyl Bonding

HH-66 Vinyl Adhesive is an industrial strength cement widely used for vinyl material repair, maintenance and manufacture.

- Used extensively as the gold standard in PVC applications for the marine industry.
- HH-66 creates an outstanding flexible bond, superior in the refurbishing and sealing of torn fabrics and seams.
- Durable and highly resistant to oil, fuel, grease and many harsh chemicals, it is not affected by extreme weather or temperature conditions—it can even be used underwater!

Rafts/Inflatables • Boat & Awning Covers • Marine Interiors • Vinyl Tarps
